

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (canceled)

1 Claim 2 (currently amended): Security system for commercial transactions via the
2 Internet or other communications networks, whose purpose is to enable any user or purchaser
3 to avoid having to enter his bank information over the network, comprising: using the user's
4 telecommunication service provider or an intermediary finance company as a bridge element
5 between this user and the company supplying the product or service in question, so that the
6 user enters his personal information by filling in a form; this information is compared with the
7 data received from the telephone or finance company, which has this information in
8 possession, to accept the purchase if the data coincides, or to reject the purchase if not, so that
9 if the purchase is accepted, the purchase is charged to the user's phone bill ~~or personal~~
10 ~~account~~, while the supplier company will collect from the aforementioned operator at a later
11 date, wherein an application begins by asking the user to select a language to be used, from a
12 group of languages pre-set for that purpose, following which the user is informed of the
13 possibility of using the same remote purchase service by means of a credit card accepted at
14 authorized establishments; if the user does not choose to pay with a card, information
15 corresponding to the subscriber phone number from which the call was made and to the
16 subscriber himself is received from the telephone service provider or finance company
17 authorized to provide the service, for later verification, after which the user must fill in a form

18 requesting his personal information, as well as information about whether he placed the call
19 from his subscriber telephone number or from another number; in parallel, an identifying
20 password is requested, so that once all the information has been checked and compared, with
21 the possibility of correcting mistakes or canceling, the user goes on to a consignee data form;
22 in this form, the user reflects the information corresponding to the place where the shipment is
23 to be delivered, and this is followed by another form corresponding to the information about
24 this delivery in terms of lead time, time of day, day, month and year for the delivery; next,
25 communication is established with the supplier company, and the user's encrypted data is sent
26 and his purchase confirmed.

1 Claim 3 (original): Security system for commercial transactions via the Internet or other
2 communications networks, according to claim 2, wherein the user places the call from a
3 number other than his own phone number, the application, after checking to make sure that
4 this subscriber number appears on the form, establishes a pre-determined period, for example,
5 24 hours, to confirm the purchase from his own phone number.

Claims 4-21 (canceled)
